

# Weather Outlook

**For those GRIC Members or Employees: below are a few safety tips:**

- Keep warm, stay inside if possible. If you need to go out, dress in layers and wear hats, gloves and a coat.
- Keep heat sources away from space heaters at least 3 feet. Never leave children unattended near a space heater.
- Make sure to drink enough fluids, as you dehydrate faster in cold weather conditions. Dehydration causes headaches, dizziness and fatigue, and it is important to stay alert outdoors.
- Be sure on check on your pets
- Residents are encouraged to check on family members and elder neighbors.

## Space Heater Safety Tips

Check Heater Certifications

Maintain Your Heater Properly

Keep the Heater Three Feet Away From Anything That Can Burn

Put The Heater On a Flat Floor

When You Leave The Heater Alone, Turn It Off and Unplug It

Don't Try to Warm Anything But the Room

Don't Combine Heaters and Moisture in Any Way

Remember Any Ventilation Requirements
