

Electronic Health Record (EHR) Software Update

FRIDAY, JULY 26, 2019

If you have a cellphone, you may need to update it to ensure its performance. Likewise, GRHC needs to conduct an update for our Electronic Health Record software (EHR).

A patient's EHR is the hub of all medically relevant patient information that is crucial to patient care.

The update will begin at 6:00 pm Friday, July 26th.

Patients may experience minor delays through the morning of Saturday, July 27th during the implementation of the upgrade.

We appreciate your patience and thank you for your support while we conduct this system maintenance.

GRHC Driving IT Enhancements that will Positively Impact our Patient Experience.
