

Department of Public Works

DPW Solid Waste currently has two trucks down for repair. Due to the shortage of available trucks, it is estimated that DPW will not be able to empty recycling containers until June 12, 2024.

If residents are able, please take your recyclables to one of the containers available throughout the Community. Otherwise, please store your recyclables until we have trucks available.

Please call DPW at 562-3343 if you have any other questions.

Thank you for your understanding.
