Weather Alert

Date: August 1-2, 2025

EXTREME HEAT WARNING

The National Weather Service has issued an Extreme Heat Warning for Friday and Saturday, with peak high temperatures of 114 degrees. Prolonged and long-duration excessive heat events are likely to cause public health impacts. Record temperatures for this time of the year are expected.

Threatening Risk for heat-related illnesses for pets, livestock, and those who are sensitive to heat, especially those without effective cooling and/or adequate hydration.

Heat Preparedness Tips include; stay inside in a cool ventilated place whenever possible, restrict outdoor activities to early morning or evening. If you have to be outside, wear lightweight, loose-fitting, light colored clothing, drink plenty of water, take frequent breaks and check on family members and elder neighbors. Avoid exposure to the sun from 9am to 6pm.
